WHITSUNDAYS

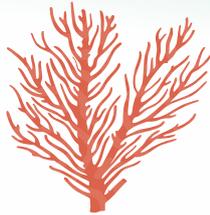

QUEENSLAND

Ocean Rafting™

THE ORIGINAL AND MOST AWARDED TOUR IN THE WHITSUNDAYS!

REEF SEEKER

Become a Marine Biologist for a day with Ocean Rafting's Reef Seeker educational adventure.

INTRODUCTION

Explore the ‘Wild Side’ of the Whitsundays and Great Barrier Reef with multi award-winning Ocean Rafting and our Reef Seeker educational package!

Join our Eco Hosts, Master Reef Guides and Marine Biologists on an interpretive and hands-on guide to the Ecological, Biological, Cultural and Geological beauties of this World Heritage Listed paradise.

With personalised guided snorkelling tours, you will have the opportunity to collect valuable data and learn about key species, reef threats and the vast diversity of the Great Barrier Reef, with your findings contributing to the Great Barrier Reef Marine Park authority’s monitoring program, ‘Eye on the Reef’.

Enjoy the paradise of Hill Inlet and Whitehaven Beach with a guided and informative bushwalk from the mangrove shallows, to the iconic look-outs over the famous swirling sands of Hill Inlet.

Rest and relax on the picturesque silica sands of Whitehaven Beach, whilst you enjoy a fresh tropical lunch and engage with our experienced crew during an interactive question and answer session.

With a focus on education and learning, this inspiring and hands-on tour is perfect for any reef enthusiast to get a real taste of being a Marine Biologist and Eco-Warrior for the day!

Ocean Rafting’s exclusive access and permits to Hill Inlet, Whitehaven Beach and top snorkelling spots will give you the ultimate Whitsunday and Great Barrier Reef experience!

EXPERIENCE OVERVIEW

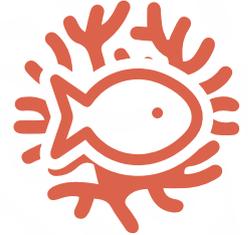

Ocean Rafting's Reef Seeker is an educational tour designed to create meaningful memories whilst connecting you to the wonders of the Great Barrier Reef Marine Park and Whitsunday Islands. This experience includes:

- A fun, high energy day trip including interpretive talks, epic marine life encounters and Ocean Rafting's signature adrenaline fuelled boat ride.
- Small group guided snorkels with tuition and assistance with collecting citizen science data.
- A structured 90 minute snorkel amongst the beautiful fringing reefs of the Whitsunday Islands.
- A comprehensive water safety brief and snorkel tuition, including use of flotation devices.
- An introduction to Eye on the Reef and Rapid Monitoring.
- Educational reef brief on key indicator species and their significance.
- Opportunities to enjoy your own time whilst snorkelling the reef.
- A scenic bush walk to the famous Hill Inlet Lookouts overlooking the swirling white silica sands of Hill Inlet and Whitehaven Beach.
- A guided beach and mangrove walk exploring the different ecosystems and their inhabitants including stingrays, juvenile lemon sharks and soldier crabs.
- Up to an hour and a half to relax on the tranquil Whitehaven Beach and enjoy a fresh tropical lunch.
- A complimentary shuttle service to and from Coral Sea Marina.

OPTIONAL EXTRA

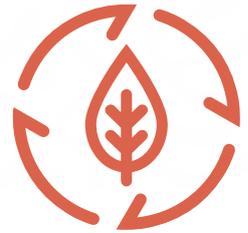

1-hour workshop with our experienced crew prior to the tour, providing extra insight and background on the Reef Seeker content in order to further enhance your Great Barrier Reef experience.

LEARN ABOUT THE 4 KEY THEMES OF OUR WORLD HERITAGE WONDERLAND

BIODIVERSITY

Explore the incredible diversity of the Great Barrier Reef.

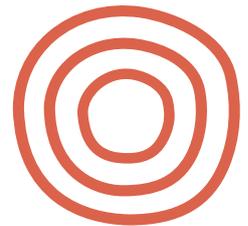

ECOLOGICAL

Gain an understanding of fish identification and ecology.

GEOLOGICAL

Immerse yourself in the geological formation of the Whitsunday Islands.

CULTURAL

Acknowledge the cultural significance of the Whitsundays.

What is Citizen Science?

Citizen Science can best be described as scientific research being conducted by the general public. That’s you! In a world that is constantly changing, it has never been more important to monitor places of outstanding natural value. Ocean Rafting’s Reef Seeker gives you the chance to connect with the natural wonders of the Whitsundays, whilst contributing significant information directly to the Great Barrier Reef Marine Park Authority (GBRMPA).

What is GBRMPA?

The Great Barrier Reef Marine Park Authority - or GBRMPA - is responsible for the protection and care of the reef. They work with a wide variety of partners, supporters and advisors with the aim of conserving the reef for future generations.

What is Eye on the Reef?

Eye on the Reef is a powerful monitoring program that enables anyone who visits the Great Barrier Reef to collect valuable information on its health and report it directly to GBRMPA.

What is Rapid Monitoring?

Rapid Monitoring is the official Citizen Science method for the Great Barrier Reef Marine Park Authority which offers visitors an immersive educational experience where you will learn about the fascinating underwater world. Rapid Monitoring is suitable for anyone! Led by a trained guide, participants will be taken on an underwater safari recording key coral reef health factors as well as several iconic marine species.

RAPID MONITORING

Ocean Rafting's Reef Seeker program will focus on the indicator species, why they are important and how to identify them as the key components during a guided snorkelling tour. A more in-depth version of Rapid Monitoring can be included for more experienced groups. See intermediate and advanced details below.
